My Good Practice in Learning is...

LEARNIN

Use methods of memorization such as the memory palace or be careful during the lesson.

♡ 0

6 thinking hats

It made me think of 6 different perspectives of an experience. I will use it when I only see the negative of something.

♡ 0

Taking and making notes

I find it best when I write my own notes, especially if I use different coloured pens and drawings.

♡ 0

Taking and making notes

I think that the simplest method is the best one too. It is often applicable and can be done on your own way.

♡ 0

Mind maps

For me, seeing everything in front of me as a picture of how it all relates makes me understand in the best way possible.

♡ 0

Using methods of memorisation and taking and making notes.

I don't find it hard to memorise stuff so I like to memorise the most important stuff for an exam etc. When it comes to making and taking notes, I like to write imp stuff mentioned in class and adding on research I found online or in our book. I reading over notes to be the best way I learn.

♡ 0

Flash card and maps

It is a good way to learn something, maybe with some references in the maps to help the brain to do the right connection between the things you already know and the thing you don't know

♡ 0

6 thinking hats

I chose this for its linear critical thinking which can narrow down ideas and help to focus

♡ 0

Taking and making notes and mind maps

I preferred these the most as they are two very simple methods that would always come in handy whatever the situation is. They are also the simplest but have the biggest impact on learning.

♡ 0

Taking and making notes

I find this method best as when I am writing I find it much easier to remember. I also like this method because I am free to use my creativity e.g. by adding a drawing or by using different colours.

♡ 0

Metodi di memorizzazione

♡ 0

Prendere appunti e fare mappe

♡ 0

Taking & making notes

It is easier for me to understand and memorise content when I take and customise my own notes.

♡ 0

Taking & making notes

For me taking and making notes is the best because helps you to memorize faster and you can do it on your own

♡ 0

Flashcards

They make studying so much more efficient and active as you are constantly "testing" yourself to see what you know and what you don't know. This makes studying more engaging so I will be able to be stimulated and stay focused for longer.

♡ 0

Circle time e discussion per me è la pratica migliore perché attraverso il confronto con l'altro riesco a conoscere svariati argomenti di cui non ne ero a conoscenza oppure di cui ne ho ampliata

♡ 0

Mind maps

Using mind maps makes learning and memorizing easier for me

♡ 0

Mind maps and Flash cards

I have a photographic memory and so mind maps and flash cards help me study and remember most things more easily.

♡ 0

Flash cards and mind maps

I find that work best for me as I have a mostly photography memory, so I find I learn better with them.

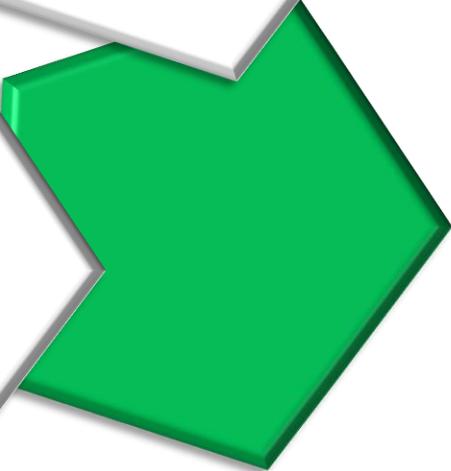

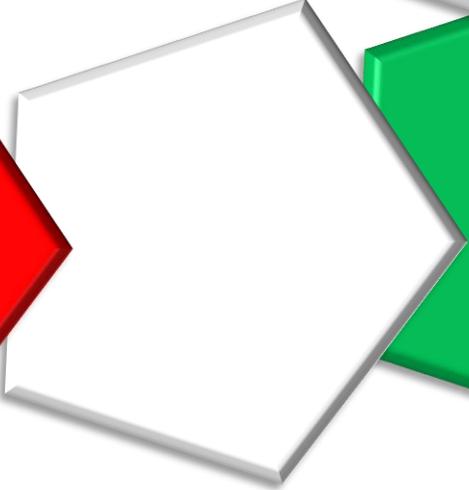

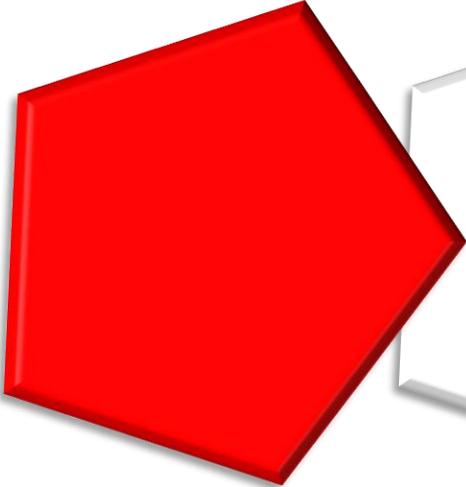

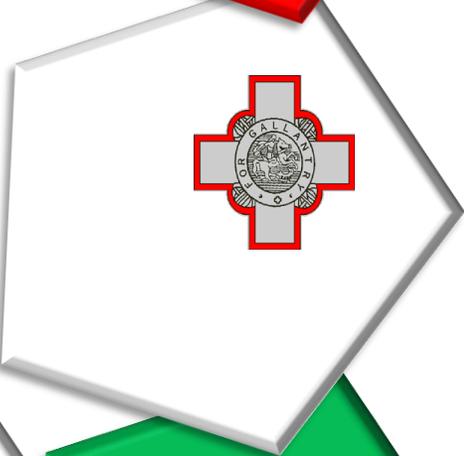

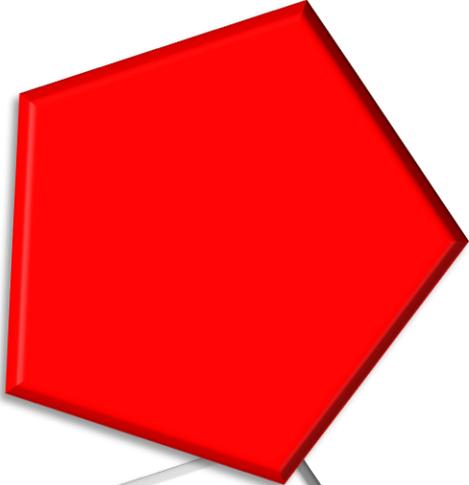

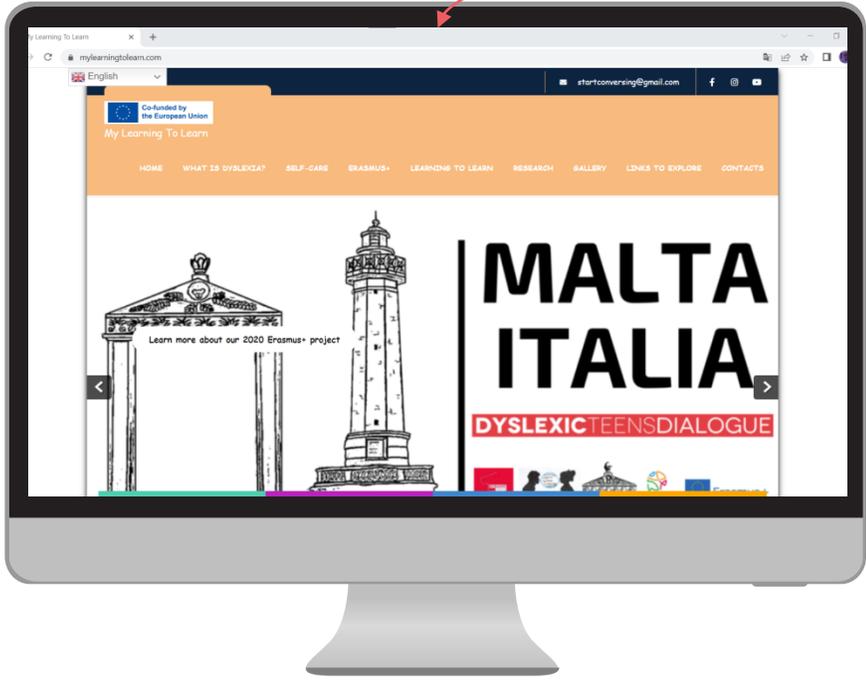

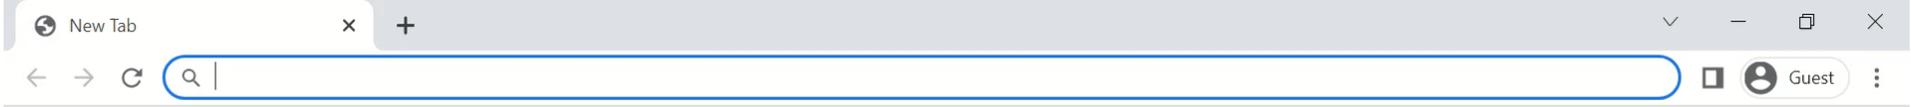

♡ 0

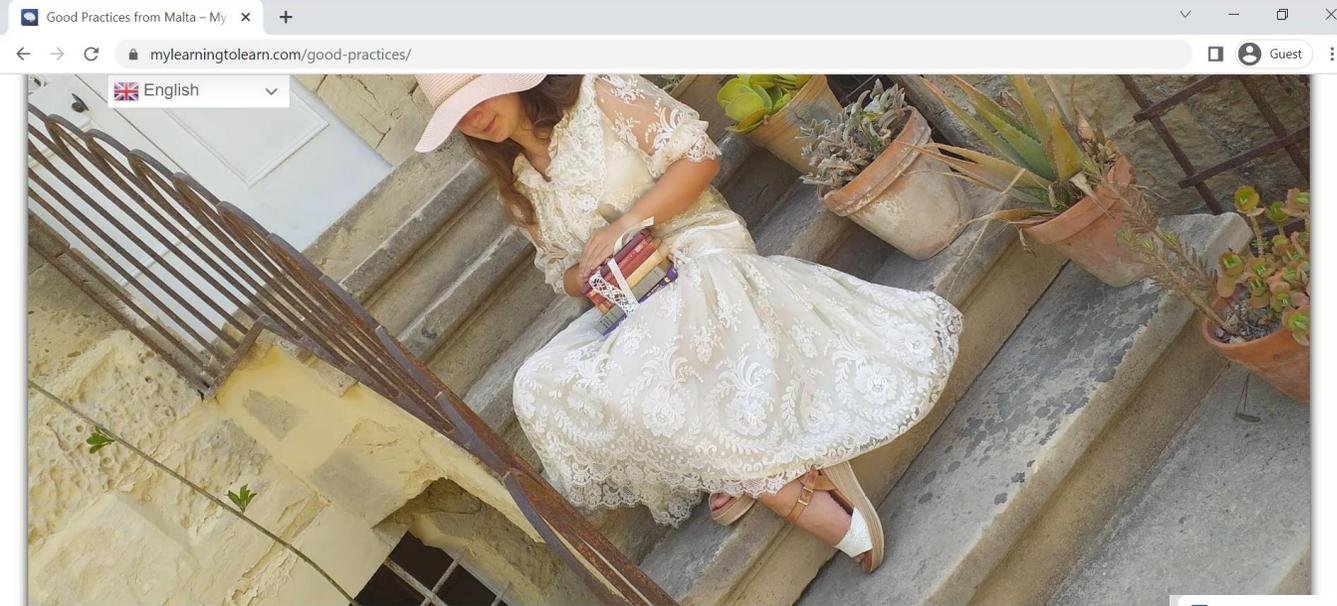

Flashcards, taking and making notes, and working out past papers

By taking notes, I write down what I need to learn, and by flashcards, I can quiz myself on what I need to know instead of asking for someone to ask me themselves. Past papers help to notice which questions come out most common and allow me to test myself, especially when giving them to a teacher to correct.

Example Transnational Youth Initiatives

THE PROJECT TOOK PLACE FROM 18/01/2019
TO 18/12/2019 in Town, Belgium

TRANSNATIONAL YOUTH INITIATIVES

Transnational Youth Initiatives are projects that are initiated and carried out by two or more groups of young people from different countries. Transnational Youth Initiatives allow young people to address specific problems or challenges, and put their ideas into practice, thereby providing an important non-formal and entrepreneurial learning experience. By implementing their project, young people reflect upon its topic in a European context. Youth Initiatives can also lead to self-employment or setting up of associations or organizations.

Erasmus+ is the European Union's programme for boosting skills and employability through activities organised in the field of education, training, youth, and sport. Youth activities under Erasmus+ aim to improve the key competences, skills and employability of young people, promote young people's social inclusion and well-being, and foster improvements in youth work and youth policy at local, national and international level.
